

ACCELERATE YOUR PACE

The momentum of modern business shows no signs of slowing down. If anything, it's accelerating. Enterprises have to operate in an always-on, digital world in which we all expect results on demand. But their incumbent systems are letting them down.

Seven reasons to move to cloud financials today ...

Cloud Financials Keep You Ahead

"Every month that passes is yet another missed opportunity."

1

You can't Afford to Delay Change

A cloud financial system supports business agility because it offers the freedom to adapt rapidly, at the precise moment when it will be most impactful

Business Demands to Know Now

When financials run in the cloud, the data is available in real-time to stakeholders wherever they are

2

3

Information Logjams Cost You Money

A cloud financial system that's designed to work in sync with other business functions can eliminate the need for workarounds and spreadsheets.

Automation Makes You Lean

A single, connected system that integrates easily with other cloud-based systems helps an enterprise eliminate time-consuming manual processes and take full advantage of the connectivity and digital features of today's smart devices and applications.

4

5

Self-Service Helps You do More

A cloud-native system includes a robust access management infrastructure to control who has access to create reports and the data they are authorised to view. These may be created and maintained by finance or delegated to other departments.

You Have to Find Answers Faster

Online collaboration is a natural fit for a cloud-based financial system. When conversations happen in the context of the transactions and documents they refer to, people have the information in front of them to be able to resolve questions quickly and accurately

6

7

You Want to be Thinking Ahead

In today's fast-moving, digitally connected world, enterprises have to be on top of their game to survive and thrive. Cloud financials provide flexible automation that frees up resources while right-time reporting delivers appropriate business metrics.
